Gleason Tool Co.
Rochester N. Y.

I got through at the Hoe Co's Saturday noon. The gear planer is working very well indeed. Enclosed please find tracing from which a blue print should be taken and sent to Hoe with the formers. George Glatt has the template ^{by} ~~with~~ which to drill the formers. If you can ship them by Wednesday afternoon it will be time enough as they has several pair of mitre gears to rough out in the mean time. Bilgrim of Phila

has been cutting gears for this concern.

96° in the shade Saturday at noon near the City Hall New York Friday was 94°. The trip from New York to Fall River is ~~at~~ far and away ahead of anything of the kind in America.

I will call on Hill Clarke & Co tomorrow morning and will spend the day in Boston. Tuesday Waterbury Wednesday Hartford and will be home Thursday morning early.

Yours

James E. Gleason

I called on a few concerns in New York but they talked principally about hot weather and hard times.
